Process to become carbon neutral

Why should I become carbon neutral?

Human activity produces annually 30 billion tons of CO₂. With this speed are humans changing atmospheric composition rapidly, and scientists believe that it is linked with the rising of earth's temperature and higher frequency of natural disasters such as floods, droughts, hurricanes and others.

Carbon footprint is the amount of CO₂ produced by person, company or organization. Carbon neutrality means that person neutralize his carbon footprint with purchase of credits from carbon reduction project. Therefore his own impact on nature will be neutral.

Process to become carbon neutral entity

1. Express interest
2. Do audit on your carbon footprint
3. Buy CER/ERU/VER
4. Get compensatory report
5. Become Carbon Neutral
6. Promote your carbon neutrality

Express interest

First thing what company, organization or individual should do is to express interest in becoming carbon neutral entity. We can guide you through whole process.

Audit of carbon footprint

Do a carbon footprint audit. You can use services of auditor companies, or you can use CEB to calculate your carbon footprint.

Buy CER/ERU/VER units and retrieve compensatory report

When you know how many CO₂ you have produced for specific year, you can buy reduction units on the market. It is possible to buy one reduction unit or thousands or millions in the [Carbon Place](#).

Become Carbon Neutral

With the compensatory report CEB can issue for you a certificate that you, your company or your organization is Carbon Neutral.

Promote your Carbon neutrality

By using CEB Carbon neutral logo on your products, or showing the certificate of Carbon Neutrality in your office, your partners or your clients can see that you care about the environment.
